Ayush Agnihotri

WEB DEVELOPER

About Me

Hi! I'm Ayush Agnihotri, an aspiring web developer with a strong passion for creating clean, responsive, and user-friendly websites. While I may not have formal industry experience yet, I've been actively learning and building projects to sharpen my skills in HTML, CSS, JavaScript, and modern web development frameworks.

My journey into web development started with curiosity and quickly turned into a serious pursuit. I've completed several personal projects, contributed to small open-source tasks, and continually explore best practices in UI/UX design and front-end development. I'm especially interested in building accessible, mobile-friendly websites and learning the technologies that power the modern web.

I'm currently looking for opportunities to apply what I've learned, grow through real-world experience, and contribute to meaningful projects. Let's build something great together!

Skills

Frontend

HTML & CSS
JavaScript
React.js
Responsive Design

Backend

Node.js
Database: MongoDB, MySQL
Authentication & Authorization

Tools & Other

Git & GitHub
Webpack & Babel
Testing & Debugging

Projects

Portfolio Website

A personal portfolio website (like this!) showcasing my projects, skills, and experience. Built using React and Tailwind CSS with responsive design.

E-commerce Site

A fully functional e-commerce site with product listings, cart, and checkout features built with Node.js and MongoDB.

Blog Platform

A modern blogging platform with user authentication, rich text editor, and comments functionality. Developed with React and Express.

Task Manager App

A task management web app to organize daily to-dos with drag and drop and notification features.

Get in Touch

Interested in working together or want to say hello? Feel free to reach out via the form below or through my social links.
